16 May 1974

MEMORANDUM FOR: Chief, Imagery R&D Division, OD&E
SUBJECT : Human Factors Testing Support
REFERENCE : Your Memo this Subject, OD&E-0534/74,
dated 9 May 1974

STATINTL

1. I am pleased to respond affirmatively to your request for human factors testing support in the development of new light tables for NPIC. The kind of consultative assistance you envision is well within the capabilities of [REDACTED] and his research group, and represents the kind of highly cost-effective utilization of in-house resources which we seek to encourage. As you say, outside resources of this type carry very high price tags.

2. As to the amount of support we can lend, I can observe only that the general scope of the requirements and the timetable you outline seem feasible. Study design, data analysis and interpretation would be the major areas of input from this Staff, working closely with those responsible for the actual conduct of the studies and the data collection.
